

We're Best on Your Bottom Line

Caterpillar Marine Power does more and costs less.

Value

Purchasing a new engine for your boat is a big move. You need to ask yourself if you want the cheapest power you can buy or the lowest cost. They are not the same. Why? Because the purchase price is only between 10% and 30% of the cost of owning and operating an engine. The rest is in installation, fuel and oil bills, repairs, maintenance, depreciation and downtime. It therefore makes sense to look at the big picture if you want your fishery to be really profitable.

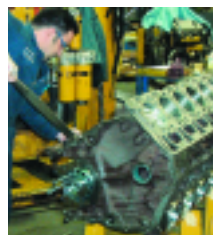

The Complete Package

Caterpillar builds marine engines for lowest total cost at a very competitive purchase price. They are engineered to be inexpensive to install, provide the best fuel economy, offer more reserve power, meet Transport Canada rules and current and future exhaust emission limits. From Toromont you will get a complete engine package, expert installation advice, a comprehensive sea trial and a rock solid warranty all at a very competitive price. New Caterpillar compact marine generator sets and propulsion control systems mean you can now purchase everything from Toromont and install it for less.

Parts pricing and availability?

New and Remanufactured Caterpillar parts are inexpensive and we ship 95% from local stock. You can even order them over the Internet 24hrs a day, 7 days a week and know exactly when they will arrive! Have Toromont do your Caterpillar engine rebuild and you can purchase "like new" engine warranty. It's peace of mind few other suppliers offer. The bottom line of **Caterpillar Marine Power** is that it **does more and costs less**. For more information, please contact Darrell Lambert at 709.722.5660.
